

PHP Framework: Codeigniter(二)

練習環境：Windows 10 + wagon-1.3.1

建議工具：PhpStorm + Notepad++(Sublime Text, VS Code, Atom IDE)

Model (資料庫操作)

application/model/

繼承 CI_Model 類別

`$this->db->select()`

`$this->db->from()`

`$this->db->get()`

`$this->db->where()`

`$this->db->like()`

`$this->db->join`

`$this->db->or_like()`

`$this->db->group_by()`

`$this->db->order_by()`

`$this->db->distinct()`

`$this->db->having()`

`$this->db->limit()`

`$this->db->count_all_results()`

`$this->db->count_all()`

`$this->db->insert()`

`$this->db->insert_batch()`

`$this->db->set()`

`$this->db->update()`

`$this->db->delete()`

Composer

- composer self-update
- composer require "**dg/rss-php**"
- site: **packagist.org**
- 結合 CodeIgniter
 - application/config/config.php

```
$config['composer_autoload'] = APPPATH . '../vendor/autoload.php';
```

```
$url = 'http://www.appledaily.com.tw/rss/newcreate/kind/rnews/type/recommend';
$rss = Feed::loadRss( $url );
foreach ($rss->item as $item) {
    print "<br /><br />";
    echo 'Title: ', $item->title;
    echo 'Link: ', $item->link;
    echo 'Timestamp: ', $item->timestamp;
    echo 'Description ', $item->description;
    echo 'HTML encoded content: ', $item->{'content:encoded'};
}
```

input

取得 post/get/cookie 的資料

```
$this->load->library('input');
$this->input->post('input_name');
```

Route (路由)

application/config/routes.php

ex:

保留的路由

```
$route['default_controller'] = 'controller_name';
$route['404_override'] = 'controller_name';
$route['translate_uri_dashes'] = 'controller_name';
```

```
-----
$route['login']['get'] = 'auth/login';
$route['login']['post'] = 'auth/do_login';
$route['login/openid']['get'] = 'auth/get_login_openid';
$route['login/openid']['post'] = 'auth/do_login_openid';
```

保留名稱
